

Easy search with filters in eDOCS!

Smart Search Manager for eDOCS provides search by free text and filters based on profile fields. Narrow results into a focused hit list.

The document is one click away

This is the vision of Smart Search Manager for eDOCS! To provide an interface with a browser-like search, making it easy to narrow down results and find items in eDOCS DM.

Rotating the vision of searching

Combining the structured and rich information base from the document and profile information, this application provides an easy and fast search, filters and sort methods.

Mobility – Find, Edit and Save

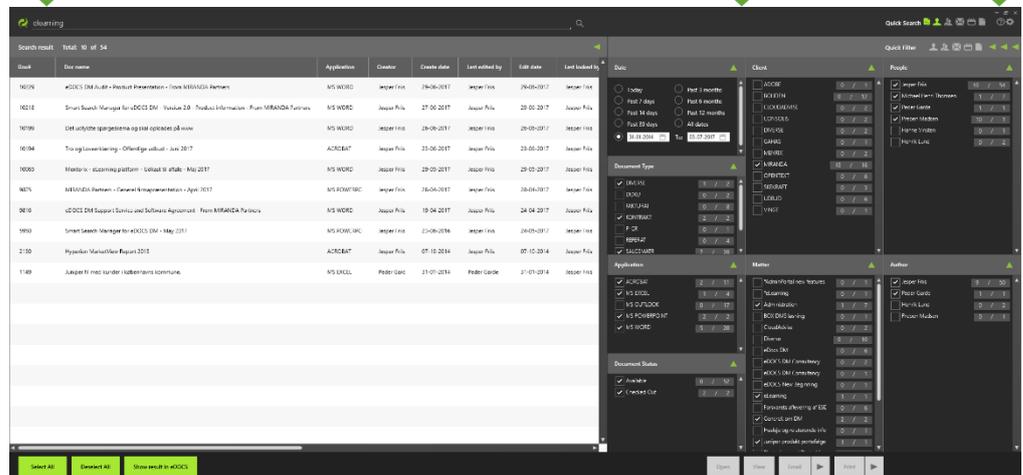

A combination of factors will give access to eDOCS DM documents from anywhere. HTTPS protocol, a local certificate, a secure access into the firewall and the Smart Search Manager application will provide an easy-to-use mobility enabled solution.

Smart Search Manager is a great boost to search functions, not a substitution!

Free text search input field and hit list

Predefined Search and Filters Online Guide

The screenshot displays the Smart Search Manager interface. On the left, a search results table is visible with columns for Doc#, Doc name, Application, Creator, Create date, Last edited by, Edit date, and Last indexed by. The table contains several rows of search results. On the right, there are multiple filter panels for refining the search. These include filters for Date (Today, Past 7 days, Past 14 days, Past 30 days, Past 60 days, Past 90 days, Past 12 months, All dates), Document Type (MS WORD, MS EXCEL, MS POWERPOINT, MS WORD), Application (MS WORD, MS EXCEL, MS POWERPOINT, MS WORD), and various other criteria like Document Status, Application, and Document Type. The interface is dark-themed and includes a search bar at the top and navigation buttons at the bottom.

With Smart Search Manager you can create a virtual funnel and easily find documents and folders in eDOCS DM – Local or Mobile.

Implementation 1-2-3

Easy implementation in 3 phases.

1. Install and configure

Without configurations to the DM profile Smart Search Manager can be install out of the box. However, who has a profile with no custom fields, right! *Please see pt. 3.*

2. Customized eDOCS Profile and Metadata is not a problem – it is expected!

Only a few organizations actually use an eDOCS profile with no custom fields. We will prepare the integration layer for you and deliver SQL scripts for easy implementation.

3. Integrated Online Guide

Online Quick guide and the intuitive interface makes the learning curve easy to climb. In the Online Guide the main functions are explained and you can access it anytime during the search.

Additional help from eLearning sessions is available.

Disruption and Inspiration

The vision of Smart Search Manager is conceived from a customer expressing the need to be able to “Search like on the internet...”. From the first version, the focus was on a very user-friendly, easy-to-learn and agile search method.

Integrated into eDOCS DM

Smart Search Manager allows you to transfer a hit list into the eDOCS Quick Retrieve. Here you can use the rich eDOCS DM functionality, like the Document Menu, associate to folders and/or store for offline use in Attaché.

Prerequisites

eDOCS DM ver. 5, 10 and 16. MS SQL server. MS .NET framework.
