

Expand eDOCS with The Managers

A suite of system and administration tools to support and improve eDOCS DM functions. Take a closer look at The Managers.

DM Sync Manager aligns MS AD and eDOCS DM automatically

DM Sync Manager is an automated synchronization tool for Microsoft Active Directory. Easy to use, install and administrate. It will keep your AD users aligned with eDOCS DM.

All settings in the Microsoft AD Accounts and Groups are reflected in the eDOCS DM Groups and People settings. Thereby users are only managed in one system.

Automated processes ensures consistency and lesser risk of security issues.

DM Sync Manager makes eDOCS DM administration faster, leaner and more accurate.

Unlock and Recover documents in DM through Admin Portal

Admin Portal is a framework that contains 3 useful tools. The portal provides a rich communication component to make support processes transparent for requesting users, helpdesk and other participants. Admin Portal contains these tools:

Recover Manager has the ability to recover a lost document from several restore points and recreate it back into eDOCS DM.

Unlock Manager provides easy and secure unlock a locked document in eDOCS DM. Helpdesk or an appointed user can unlock, but can't access the document content.

Document Info Manager is an enhanced system viewer for admins and helpdesk staff.

Keep performance high. DM Connect Manager links you to the nearest DM server and Smart Search helps you find the document.

DM Connect Manager

eDOCS DM from OpenText™ has an excellent distributed architecture where the customer can set up local cache servers (DM Servers).

DM Connect Manager ensures that you always log on to the nearest DM server. The product fits organizations where users move between several geographical locations. This product is a user-friendly alternative to the DM Connection wizard.

Meta Data Manager

This plugin will provide access to extract and update profile and additional metadata information into a document and merge fields in MS Word, MS Excel and MS PowerPoint files. (Windows only).

Smart Search Manager

This application is a handy search tool based on internet search methods. Type in some words and easy filter from the profile and metadata information in the search result. You must see this – Book a demo!
