

Safely unlock eDOCS documents

Unlock Manager for eDOCS performs a safe unlock of accidentally locked documents in eDOCS DM. Integrated security all the way.

A tool for helpdesk and admins

Unlock Manager for eDOCS is a tool that ensures a 100% safe unlock of locked documents in eDOCS DM. Unlock Manager provides an easy-to-use helpdesk function.

If a document accidentally locks in DM it can be caused by either a system error or because another DM user checked it out. If you can't get a hold of your colleague to check it back in, you need to request the support team for an unlock of the document to be able to work on it.

It takes time in a support process before an administrator gets to the actual ticket and takes care of unlocking your document.

The good news today is that Unlock Manager is a tool safely managed not only by admins, but by helpdesk also!

Reduce time and cost in the support process by using Unlock Manager for eDOCS!

Secure procedures

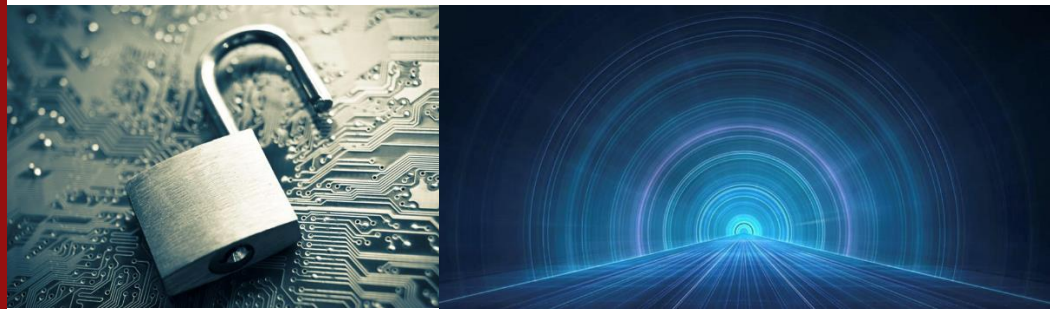

All steps of the unlock procedure are secure!

Unlock Manager for DOCS includes a wizard that takes helpdesk and admins through a security check and authorization to be able to unlock any document.

Once they are through, they can only view document metadata - not access the actual content. So even in confidential matters, you are safe by requesting for unlock or recovery of a lost document.

Unlock Manager for eDOCS accesses documents with full eDOCS DM integrated security!

Unlock Manager for eDOCS is a part of the web-based framework Admin Portal that holds great tools for eDOCS admins and helpdesk.
